

To copy the embroidery pattern design:

1. Cut out a square 50 cm X 50 cm from your fabric
2. Open the PDF file and print 4 sheets
3. Cut the patterns out
4. Tape them together, while the dashed lines face outward on each piece
5. Use transfer paper to transfer the pattern to your fabric
6. Make sure the pattern is exactly in the middle of the fabric
7. This means the dashed lines on each side have the same distance from the fabric edge
8. Do not copy the dashed lines on the fabric, use them to line up the four sides
